## WORK EXPERIENCE

### FISITA - [fisita.com](http://fisita.com) - July 2019 - Feb 2020

- Lead the transition of a new in-house web development service, project management and liaison with a number of external suppliers.
- Work with current external php developer and internal staff to upgrade, design and develop existing and new websites.
- Create and enhance online review system for its suite of international technical events.
- Build a SSR event website with React/Next. To inform new users, purchase tickets and fetch data from an existing backend for users to perform CRUD tasks in a membership area.
- Plan and design a platform for an international database of engineers which has an estimate of over 200000 engineers already interested.
- Host a react built static website on AWS S3 using Serverless to develop, deploy, and monitor the website.
- Collect interest and send confirmation and info pack for a new company product using AWS DynamoDB and lambdas.
- Audit all databases (mysql) to acquire 20 years worth of contacts ready for a new CRM system that is currently being implemented.
